20130724 Sustainable Remedy (HQ Meeting).pptx

Ray and Stephanie:

Following up on our discussions, I have attached the revised slide deck for the presentation to EPA HQ next Wednesday. You had made some comments and suggestions when we presented the previous version to you, and we have made changes in the slide deck as follows:

- Slide 12 – removed reference to “R2’s analysis” and reworded the last bullet to accurately reflect R2’s assessment of the impact of the consolidation observed at Lister Ave.
- Slide 19 – clarified that the comparison in the bar charts is made to “current” surficial concentrations.
- Slides 25/31 – removed the “recontamination potential” as this created some confusion in the presentation.
- Slide 31 – clarified the legend to indicate basis of RME assumptions to CPG.
- Slide 37 – removed the park conceptual slides – will be provided as a paper handout at the meeting.
- Slide 40 – clarified the use of Rutgers experts as being “retained” – previous language was unclear.

You now have all the slides we will present to HQ, and we believe we have met all the requirements of the process outlined by HQ. Please let us know if you think otherwise.

Best regards,

Mike
